SECA CONTRACTING

# Why Choose SECA?

SECA Contracting provides more than just backfill labour hire ...

Our focus is on **improving fleet availability** through tangible product and process improvements.

The proof is in the numbers - we have contributed to our current long term supported fleet **+ - 90% availability**.

**We also deliver long term improvements by developing product how-to guides, applying our availability framework and upskilling client personnel.**

What sets us apart?

We are a company built by electricians and communications experts focusing on those exact two items.

Each employee at SECA Contracting brings their own **deep industry knowledge** and a commitment to producing results is a prerequisite. Many have multi trade qualifications across different disciplines.

With hands-on experience across major mine sites and technologies, we provide reliable, efficient electrical solutions that **keep your operations running smarter and safer.**

Solar Electrical Communications Automation

EXPERTISE

RELIABILITY

HONESTY

# Core Capabilities

## HV Electric Drive

Expert rapid field support and routine maintenance for high voltage electric drive machinery.

## Autonomous Mining & Operational Technology

Onboard AMS and offboard OT systems and networks

## Electrical Contracting

Electrical compliance & Installing work

# ■ PROJECT SPOTLIGHT

## THIESS Ironbridge

Our team has proudly delivered exceptional service 24/7 on the Liebherr T264 fleet at Thiess Ironbridge project since September 2024. We were also involved with the early installations of the advanced Fortex fleet management system and were quickly trusted with management of the onboard product on site. Leveraging our extensive expertise, we provide comprehensive mobile maintenance and technology support (including Tyre-sense, Motion metrics, AVI, Tetra & Terrain) around the clock, through a crew of qualified HV electricians and communications specialists.

Additionally, we provide HV workshop electrical supervisor coverage, and general electrical services. This includes electrical compliance and electrical maintenance tailored to fill gaps in the client's capacity as required.

For the duration of the project, we have been able to meet tight deadlines without compromising on workmanship. We are proud to boast a flawless safety record with zero incidents, underscoring our commitment to protecting both personnel and assets. Through close collaboration with Thiess and becoming an integrated part of their operations at Ironbridge, we have built a relationship that has resulted in a discernible increase in fleet availability and workshop efficiency.

# Availability is King

Capable of more than your typical electrical contractor

## How-to Guides

We develop customised how-to guides for your systems, which can be referred to by your people for years to come.

## Availability Framework

We are currently developing a framework designed to improve fleet availability.

## Upskilling

We can upskill your workforce, to ensure there are more boots on the ground filled with the knowledge to tackle complex fleet issues.

# 90%

**FLEET  
AVAILABILITY  
MAINTAINED  
ON CURRENT  
LONG TERM  
PROJECT**

Our key motivator is improving fleet availability for our clients, and maintaining it. Modern problems require modern solutions. The mining industry is steadily becoming a technology business, but current mobile maintenance processes struggle to keep up. SECA has the expertise to identify pitfalls in current HV electric drive and autonomous mining systems and develop a plan to fix the problems at their source.

# ACCREDITATIONS

Every member of our team has a unique background and skillset. Collectively, our people offer the following accreditations to provide a solution tailored to your needs.

WA Electrical Contractors Licence

High Voltage Switching

OEM Drive System Training

CCNA Networking & Open Cabling  
Licence

Certificate III and IV in  
Telecommunications

Electrical Supervisor Appointments

Certificate III in Electrical and Auto  
Electrical

Certificate IV Health and Safety

# From the Owner

**Callum Wilkinson**  
Owner & HV Electrician

SECA Contracting was founded because I saw a gap in the market for a truly specialised service—one delivered by experts who understand the complexity of modern electrical systems and are committed to providing real, long-term solutions. The mining industry is evolving rapidly, with cutting-edge electrification technologies transforming the way we work. I have a strong passion for these advancements and the opportunities they create.

I envisaged a company that could tackle the toughest modern mining challenges, while providing our clients with a level of service that was unmatched by any competitor, but that was also a great place to work. I am proud to have done just that.

By building a crew of likeminded, technically excellent personnel that love what they do, SECA Contracting is dedicated to staying at the forefront of the high-tech landscape to provide the best possible service to our clients.

**I look forward to the opportunity to partner with you, bringing our specialist knowledge and tailored solutions to help your business succeed.**
